#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Response to Amendment***

1. Applicant's arguments of September 15, 2008 have been entered.
2. Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.
3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

***Claim Rejections - 35 USC § 103***

4. Claims 1-6, 8, 9, 14-17, and 22-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over O'Connell in view of Babich et al.

O'Connell discloses a fire extinguishing system including a source 2 of fire extinguishant fluid, a nozzle body 35 having a wall defining an interior cavity, and at least one extinguishant outlet 37 formed in the wall for discharging extinguishant fluid from the cavity into a fluid-filled volume (a room for example), which outlet is fixed in use. Babich et al. teach a spray device comprising a nozzle 23 having an outlet which is arranged such that a rotational movement of a spray material is induced via insert 25 to distribute the material homogeneously within a fluid-filled volume 3. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the device of O'Connell by providing a means to produce rotational movement of the extinguishant as has been taught by Babich et al. Regarding claim 5, such a modification would have required a mere change in the position of a device which is generally recognized as being within the level of ordinary skill in the art. Regarding claim 17, it would have been obvious to one having ordinary skill in the art that the

Art Unit: 3752

device would normally be placed in a room and as such the combination of the device and the room would read on the claim language of claim 17. The device will carry out the method of claim 24.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Davis D. Hwu whose telephone number is 571-272-4904. The examiner can normally be reached on 8:00-4:30. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Len Tran can be reached on 571-272-1184. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
